PROFESSIONAL SUMMARY

Junior Full-Stack Developer (Node.js & .NET/C# · React/TypeScript) with a portfolio of production applications. I build end-to-end solutions - from API and database design through testing, CI/CD, and deployment.

- Production apps with 95%+ test coverage and full CI/CD
- Clean Architecture, design patterns, Clean Code
- AI/LLM integrations (Gemini, RAG) and security (JWT, AES-256, XAdES-BES)
- Systems administration background - understanding the full application lifecycle

Open to remote work; seeking a permanent, long-term position.

TECHNICAL SKILLS

Core: JavaScript, React, REST API, HTML5/CSS3, SQL and query optimisation, Git/GitHub.

Solid knowledge: C#/.NET 8, Node.js, Next.js, TypeScript, Python, PHP, PostgreSQL, MySQL, Docker, CI/CD (GitHub Actions), Linux/Bash, PWA, SignalR (WebSockets), Web Push API (VAPID), automated testing (xUnit, Playwright), application security.

Actively learning: Tailwind CSS, Angular, cloud (AWS/Azure/GCP/Oracle).

Practices & tools: Clean Architecture, design patterns, Clean Code, Jira, GitLab, AI developer tools (Claude Code, OpenAI Codex, JetBrains Junie Pro, GitHub Copilot, v0, Lovable, Claude Design), Prompt Engineering, LLM/RAG integrations (Gemini). Team Git workflow (branches, pull requests, code review).

Additional asset: Windows Server administration (AD, GPO), Linux and networking.

Soft skills: Problem-solving · Self-reliance · Communication · Teamwork · Accountability · End-to-end project ownership

PROJECTS

KSeF Master - e-Invoicing Ecosystem

ksef-master.netlify.app

Web platform integrated with the Polish governmental KSeF v2 API - no external SDKs.

- Hybrid authentication (token / XAdES-BES certificate), AES-256 encryption, full Challenge-Response session cycle, Sandbox ↔ Production environment switching.
- PDF generation with QR codes, XML schema validation, financial statistics module.

Stack: .NET 8, C#, PostgreSQL, React, TypeScript, Vite, REST API, XAdES-BES, AES-256, Docker, QuestPDF.

SmartQuote - Sales CRM with AI Automation

smart-quote-ai.vercel.app

CRM tool automating the process from AI-generated quotes to e-signed contracts and invoice drafts.

- AI assistant (Gemini) evaluating offer profitability; custom in-browser e-signature module generating secure PDFs with a digital audit trail.
- Clean Architecture; database optimisation reducing queries by 80%; 22 Playwright tests and CI/CD.

Stack: Next.js 16, Node.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS, Gemini AI, Playwright, GitHub Actions.

Shellty.Kanban – real-time project manager with Web Push

shellty-kanban.vercel.app

Task management and team collaboration app built from scratch.

- Real-time collaboration via SignalR: live board updates, presence indicators and "who is editing" - visible to all users without page refresh.
- Web Push (VAPID + Service Worker); CI/CD, 60+ xUnit tests, 95%+ coverage.

Stack: .NET 10, C#, React 18, PostgreSQL, SignalR, Web Push API (VAPID), Service Worker, GitHub Actions, xUnit, JWT.

Shellty CMS - Corporate Website CMS

shellty-cms.vercel.app

Custom, scalable CMS as a modern WordPress alternative for B2B projects.

- Cloning a proven architecture for new clients - reducing delivery time from weeks to days; role control (admin/editor), Cloudinary integration (auto-delete).

Stack: Next.js 16, Payload CMS 3, TypeScript, MongoDB Atlas, Cloudinary, Tailwind CSS, Vercel.

More projects: Shellty Pulse, Shellty Blog, BudMax, Postlio - live demos & code: shellty-it.github.io/portfolio

WORK EXPERIENCE

Freelance / Self-employed - Shellty

Stargard (remote) · September 2025 – present

- Independent end-to-end delivery of commercial web projects (logistics, IT, construction): requirements gathering, architecture, full-stack implementation, deployment, client communication.
- Growing a portfolio of production applications in .NET/React and Next.js; participation in engineering academies.

IT Systems Administrator / Developer - Streetcom

February 2024 – August 2025

- Worked with a 4-person development team and project managers on diagnosing and fixing application bugs (Tier 2/3) directly in the application code.
- Frontend/UI layer optimisation - improved interface readability and user engagement.
- Participation in designing, modernising and optimising internal systems.

Earlier IT Experience - ATA, Hisert, RZGW (Szczecin)

2021 – 2023

- IT / IT Support Specialist: systems and network administration, infrastructure build and maintenance (incl. 3 server rooms, ~5 RACK cabinets, ~100 workstations), deployment of a follow-me printing system (MPS) for the entire Polish Waters organisation, troubleshooting and user support.

CERTIFICATES & ACADEMIES

- Relevate - Ascent Academy for Engineering, Relativity & Nerds Family (2026) · [certificate PDF](#)
- Relevate - PM Academy, Project Management (in progress, 2026)
- DWthon | Software 3.0 (RAG) - Data Workshop (2026) · [certificate PDF](#)
- Python – Programming - Navoica (2026) · [certificate PDF](#)
- Hardware Configuration and Computer Network Management - Navoica (2026) · [certificate PDF](#)
- Fundamentals of Artificial Intelligence - Navoica (2025) · [certificate PDF](#)
- GitHub Copilot for Developers - Coders Lab (2025) · [certificate PDF](#)
- PHP Developer - Strefa Kursów (2025) · [certificate PDF](#)

EDUCATION

West Pomeranian Business School - Computer Science, specialisation: Mobile Applications (2017–2021) · [diploma PDF](#)

ADDITIONAL

Languages: English B2, German A1

Interests: fishing, physical training, gardening, cooking, playing musical instruments
